

Data Registry Services

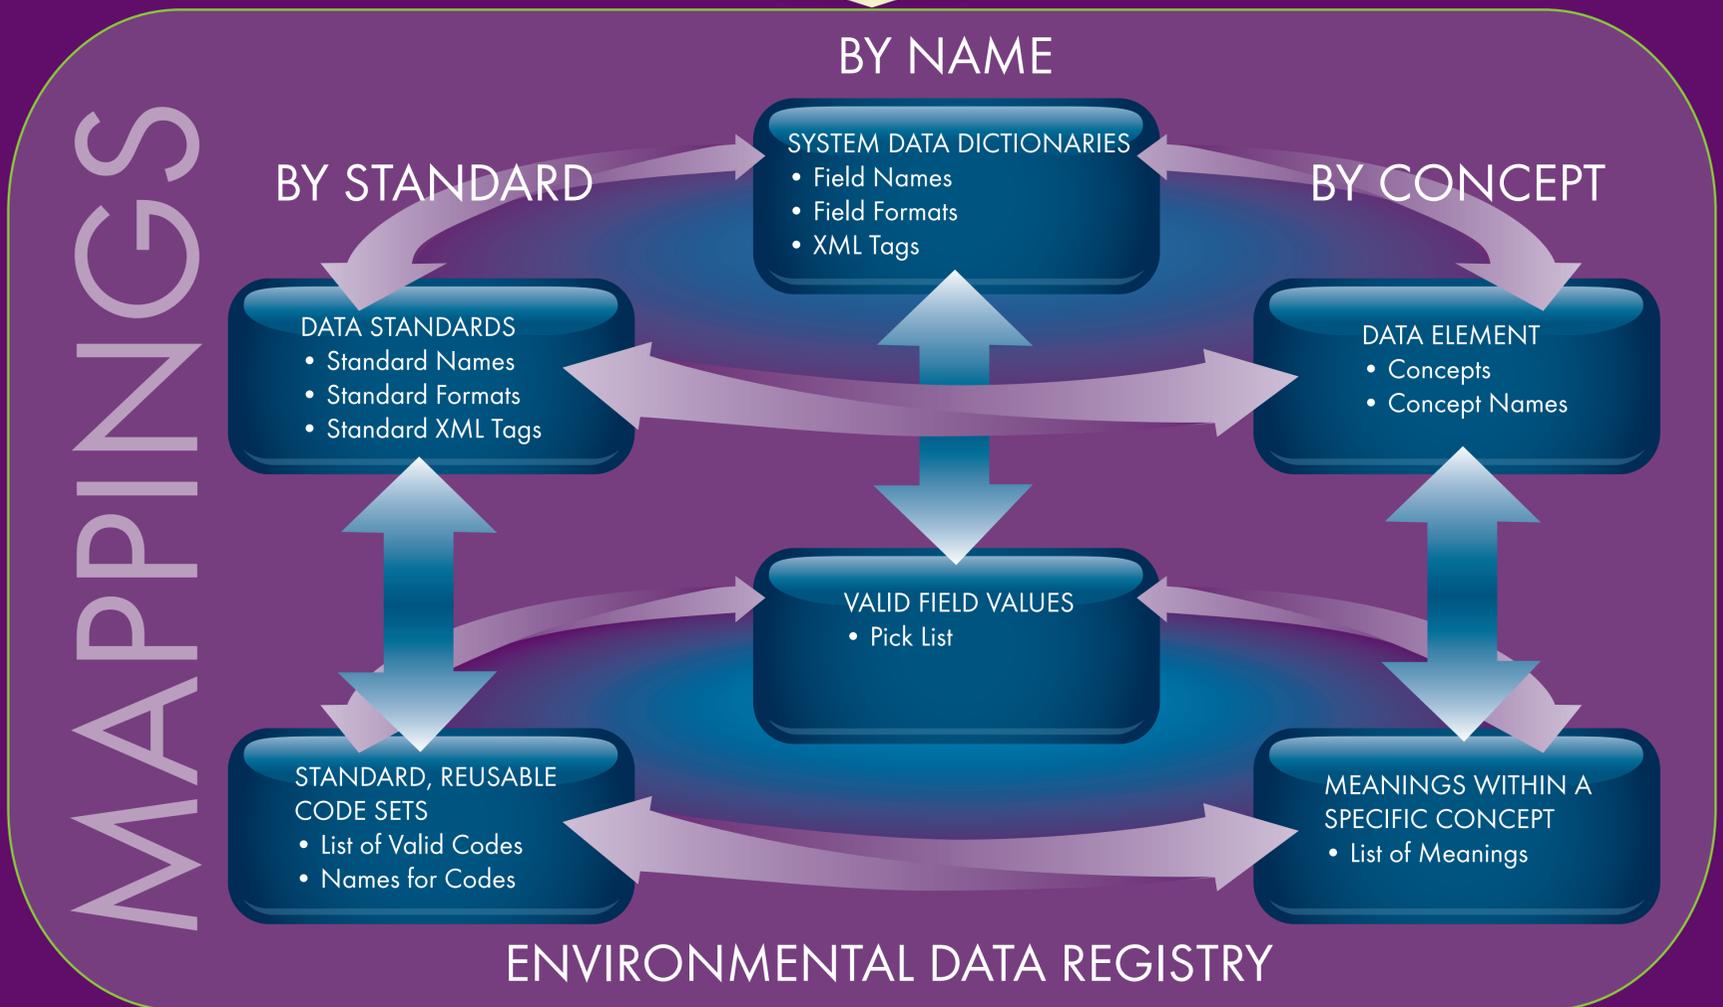

Promoting Data Quality and Building Toward the Semantic Web

- SERVICES**
- Translate from one code set to another with web services
 - Validate codes within systems or data sets
 - Reuse code sets, XML tags, field names and structures
 - Compare fields between systems or compare fields to data standards
 - Update selected code sets within systems automatically
 - Display the meaning of data fields and codes to system users
 - Support queries by names and concepts (finding data by ideas)

SEARCH, FIND, AND COMPARE AGENCY ENVIRONMENTAL INFORMATION

Available through the System of Registries

EPA and Partner Systems
